

ALBERTA SITE REHABILITATION PROGRAM

PROGRAM UPDATE

The Government of Alberta is releasing the second funding increment of \$100 million for the Site Rehabilitation Program, and applications will be accepted from **May 19 through June 18**. The second round of funding is focused on cleaning up wells and facilities on private land, specifically where landowners have not been receiving compensation. We will continue to diligently track future program updates and funding increments as they develop.

WHO NEEDS THIS?

- ✓ Operators who want to reduce their liabilities by leveraging 100% government funding for site closure work including abandonment, environmental site assessments, remediation, and reclamation.
- ✓ Operators who have sites to close on private land, where landowners have not been receiving compensation.

HOW? WE'LL SECURE THE FUNDING & COMPLETE THE WORK

We can support in taking full advantage of this funding program by reviewing site location data, developing a strategic approach to address the environmental liabilities, executing the necessary remediation and reclamation work, and managing the application process.

Integrated Sustainability can support with the eligible activities including:

- Closure work on inactive wells and pipelines
- Environmental Site Assessments (Phase 1 & 2)
- Reclamation and Remediation Work
- Preparation of Reclamation Certificate Applications

WHY WORK WITH INTEGRATED SUSTAINABILITY?

We have **over 100 subject matter experts** who have focused their careers on protecting and restoring the environment while supporting industrial clients to achieve economic and sustainable solutions to their challenges. Our group of abandonment and environmental professionals understand the importance of this stimulus package and the opportunity it gives many of our customers. We want to **support operators in maximizing the grant financing and lowering their liabilities**. Since we are a fully integrated environmental infrastructure company, we approach projects differently from consulting engineers, environmental consultants, and typical earth moving companies. Our clients receive much **more value** when we are involved in the front-end work of projects and carry the project through to execution. This approach creates working efficiencies and enables our clients to fully maximize funding provided by the Site Rehabilitation Program.
